Basic Information

- Place of Origin: China
- Certification: CE
- Model Number: CG125
- Minimum Order Quantity: 10

Product Specification

- Application For: MX Bike
- Model: Pulsar 180/135
- Suit For: Honda CRF R X 450 250
- Noise Level: Low Noise
- Oem Replacement: OK
- Friction Coefficient: High Friction Coefficient
- Durability: Long Lasting
- Surface: Copper Based
- Highlight: **friction brake pads copper based, r x 450 250 friction brake pads, pulsar honda brake pads**

Product Description

Product Description:

Our brake pads are a custom service, ensuring that they fit perfectly with your motorcycle. We know that every bike is different, which is why we offer this service to make sure that our product is tailored to your specific needs.

One of the most important aspects of brake pads is their durability. Our motorcycle brake pads are long lasting, meaning that you won't have to replace them as frequently as other alternatives. This is because our brake pads are designed with high-quality materials that are built to withstand the wear and tear of regular use.

As a product type, our motorcycle brake pads fall under the category of motorcycle parts and accessories. They are an essential component of your motorcycle's braking system and play a vital role in ensuring your safety while riding.

The back plate of our brake pads is copper-based. This is an important feature because copper has excellent heat dissipation properties, which helps to prevent brake fade. The back plate is an essential part of the brake pad because it provides support and stability during braking.

It is important to note that our motorcycle brake pads are not just any brake pads. They are high-quality brake pads that are designed to provide you with the best braking performance possible. We understand that you rely on your brakes to keep you safe on the road, which is why we have designed our brake pads with the utmost care and attention to detail.

Finally, we would like to emphasize the importance of the brake plate. The brake plate is the part of the brake pad that comes into contact with the rotor and is responsible for stopping the wheel. Our brake pads have a carefully designed brake plate that provides excellent stopping power, ensuring that you can stop your motorcycle quickly and safely.

Features:

Product Name: Motorcycle brake pad

Stopping Power: Strong

Suit For: Honda CRF R X 450 250

Model: Pulsar 180/135

Back Plate: Copper Based Brake Plate

Package Contents: 1 Pair Of Ceramic Brake Pads

Technical Parameters:

Product Type:	Motorcycle Parts & Accessories
Model:	Pulsar 180/135
Back Plate:	Copper Based
Friction Coefficient:	High Friction Coefficient
Custom Service:	OK
Surface:	Copper Based
Performance:	High Performance
Suit For:	Honda CRF R X 450 250
Package Contents:	1 Pair Of Front Brake Pads
OEM Replacement:	OK

Applications:

Our brake pad parts are designed with a high friction coefficient, ensuring your motorcycle comes to a safe and efficient stop. Additionally, our brake pads have a low noise level, making for a smooth and quiet ride.

The surface of our brake pads is copper-based, providing durability and longevity. These friction brake pads are specifically designed for the Honda CRF R X 450 250, making it a perfect fit for your MX bike.

Our brake pads are suitable for a variety of applications, including racing, off-roading, and daily commuting. Whether you're a professional rider or simply enjoy taking your motorcycle out for a spin, our brake pads will provide the stopping power you need.

With our brake plates, you can have peace of mind knowing that your motorcycle's braking system is in top shape. So why wait? Order your set of CG125 friction brake pads today!

Support and Services:

Our motorcycle brake pads are designed to deliver superior stopping power, longer life, and reduced brake fade. We use advanced materials and manufacturing processes to ensure that each pad provides consistent performance, even in extreme conditions.

Our technical support team is available to answer any questions you may have about our brake pads and their installation. We also offer a range of services, including brake pad installation, maintenance, and repair. Our skilled technicians have extensive experience working with all types of motorcycles and can help ensure that your brakes are operating at their best.

Whether you're a professional mechanic or a do-it-yourself enthusiast, we're here to help you get the most out of your motorcycle's braking system. Contact us today to learn more about our products and services.
