## Product Description

### Product Description:

The brake pad set is made of high-quality materials, which makes them long-lasting and able to withstand heavy use. They are specially designed for MX bikes, which means they are perfect for off-road adventures.

The package contents include one pair of brake pads, which means you can replace both the front and rear brakes of your bike. This ensures that your brakes are balanced and functioning correctly. With these brake pads, you can be confident in your bike's stopping power, even in the most challenging conditions.

Our custom service is available to make sure that you get the perfect fit for your bike. Our experts can help you choose the right brake pads for your specific bike model and answer any questions you may have about the product.

Don't settle for less when it comes to your safety. Upgrade your bike's brake system with these high-performance brake pads today. They are easy to install and will provide you with the peace of mind you need while riding your motorcycle.

Model	Pulsar 180/135
Friction Coefficient	High Friction Coefficient
Surface	Copper Based
Package Contents	1 Pair Of Brake Pads
Suit For	Honda CRF R X 450 250
Performance	High Performance
Custom Service	OK
OEM Replacement	OK

### Applications:

Our brake pads are specifically designed for motorcycles and are a critical component in ensuring that your motorcycle stops safely and reliably. Our ceramic brake pads are highly effective and provide superior stopping power compared to other brake pads on the market. They offer excellent heat resistance, which is important for long-term durability and reliability.

Our friction brake pads are made with a copper-based back plate, making them highly durable and long-lasting. They are designed to provide high performance, delivering optimal stopping power and responsive braking. The copper back plate ensures that the brake pads do not wear out too quickly, ensuring that you can rely on them for many miles to come.

Our brake pads are suitable for a wide range of applications and are ideal for use in a variety of scenarios. Whether you're a professional racer or just enjoy leisurely rides on your motorcycle, our brake pads are the perfect choice. They are also suitable for use in harsh weather conditions, ensuring that you can rely on them even in rainy or snowy weather.

Our motorcycle brake pads are available for purchase in quantities of 10 or more, making them perfect for both individual and commercial use. We offer custom services to meet your specific needs, ensuring that you get the perfect brake pads for your motorcycle.

In summary, our ceramic brake pads and friction brake pads are a must-have for any motorcycle enthusiast. With their high performance, long-lasting durability, and customizability, they are the perfect choice for any motorcycle application or scenario. Order yours today and experience the difference that our brake pads can make!

### Support and Services:

Our motorcycle brake pads are designed and manufactured to meet or exceed original equipment specifications. We offer a range of brake pad materials, including ceramic, organic, and sintered metal, to suit different riding styles and conditions.

Our technical support team is available to assist with any questions or concerns regarding installation, performance, and maintenance of our brake pads. We also offer a warranty on all our products.

For added convenience, we provide installation videos and guides on our website, as well as a directory of authorized service centers for professional installation and maintenance.
