Basic Information

Product Specification

- Friction Coefficient: 0.4-0.6
- Weight: 200-300g
- Material: Semi-metallic/Ceramic
- Installation: Easy
- Durability: Long-lasting
- Position: Front/Rear
- Size: Standard
- Heat Resistance: High
- Highlight: semi metallic bajaj brake pads,
front bajaj brake pads,
front bajaj dominar brake pads

Product Description

Product Description:

These brake pads are made with ceramic brake pad material, which provides superior stopping power and reduced brake dust. The ceramic material also helps to dissipate heat quickly, making them ideal for high-performance riding conditions. This means that your brake pads discs will last longer and perform better, giving you greater confidence and control on the road.

Each package contains 2 brake pads, which is enough to replace the brake pads on one wheel of your Bajaj motorcycle. The standard size ensures that they will fit perfectly and work seamlessly with your bike.

When it comes to maintaining your motorcycle, safety is key. That's why choosing the right brake pads is crucial. With Bajaj brake pads, you can be confident that you're getting a high-quality product that will deliver reliable performance and excellent heat resistance. So whether you're cruising down the highway or taking on challenging terrain, you can rely on Bajaj brake pads to keep you safe and in control.

Technical Parameters:

Friction Coefficient	0.4-0.6
Material	Semi-metallic/Ceramic
Size	Standard
Compatibility	Bajaj Motorcycles
Thickness	5-8mm
Position	Front/Rear
Durability	Long-lasting
Weight	200-300g
Installation	Easy
Noise Level	Low

Applications:

One of the significant advantages of BAJAJ brake pads is their low noise level. The noise generated during braking can be a major inconvenience to the rider and those around them. With these disc brake pads, the rider can enjoy a smooth and quiet ride, making them ideal for city riding.

The BAJAJ brake pads come in standard size and a thickness of 5-8mm, making them perfect for front and rear positions. These disc brake pads are suitable for different BAJAJ motorcycle models, making them an ideal choice for all those who own these motorcycles. The BAJAJ brake pads are perfect for various occasions and scenarios. They are ideal for those who commute to work or use their motorcycles for leisure rides. With the easy installation and low noise level, these brake pad parts are perfect for those living in busy cities, where traffic is a major issue.

These disc brake pads are also perfect for long-distance rides, where the rider can encounter different terrains and weather conditions. With the excellent stopping power, the rider can rest assured that they can stop the motorcycle even in the most challenging conditions. In conclusion, BAJAJ brake pads are an essential component of the braking system. These disc brake pads are easy to install, have a low noise level, and come in standard size and thickness. They are perfect for different occasions and scenarios, making them an ideal choice for all those who own BAJAJ motorcycles.

Customization:

Our Product Customization Services for BAJAJ brake pads provide:

Position: Front/Rear

Noise Level: Low

Compatibility: Bajaj Motorcycles

Warranty: 1 Year

Heat Resistance: High

Our brake pad parts are specifically designed for Bajaj motorcycles and are compatible with disc brake pads and brake shoes. With our services, you can customize your brake pads to meet your specific needs and preferences, ensuring optimal performance and safety on the road.
