## Product Description

### Product Description:

Our disc brake parts are available for both the front and rear positions of your motorcycle, making it easy to find the right fit for your specific needs. Designed specifically for use with Harley-Davidson motorcycles, our brake parts are compatible with a range of models from this iconic brand.

Our slotted design ensures maximum performance, allowing for enhanced cooling and preventing the build-up of heat. This feature is particularly helpful for riders who frequently ride in hot or humid conditions. Additionally, our parts are heat treated to ensure maximum durability and resistance to wear and tear.

Our brake parts are also corrosion resistant, ensuring that they can withstand exposure to the elements. This is particularly important for riders who frequently ride in wet or damp conditions. With our parts, you can rest assured that your bike will always be in top condition, no matter what the weather brings.

Whether you are a seasoned rider or new to the world of motorcycles, our range of brake and clutch parts is the perfect choice for your Harley-Davidson motorcycle. Our parts are designed to provide maximum performance, durability, and reliability, ensuring that you can ride with confidence.

Looking for other bike spare parts or Kawasaki spare parts? Be sure to check out our full range of products, including engines, transmissions, and more. With our extensive selection of parts and accessories, we have everything you need to keep your bike running smoothly.

### Features:

Product Name: Harley-Davidson motorcycle brake parts

Warranty: Limited Lifetime

Material: Steel

Type: Disc Brake

Installation: Bolt-On

Quantity: 1 Pair

Product Type: Brake System Parts

Compatible with: Kawasaki Spare Parts, Bike Spare Parts

### Technical Parameters:

Quantity	1 Pair
Position	Front/Rear
Package Contents	2 Brake Rotors, 2 Sets Of Brake Pads
Fitment	Direct Replacement
Type	Disc Brake
Installation	Bolt-On
Warranty	Limited Lifetime
Size	Standard
Material	Steel
Color	Black

### Applications:

The slotted design of these brake parts helps to improve heat dissipation, allowing for better overall performance. This feature also helps to prevent brake fade, which can occur when the brakes get too hot and lose their stopping power. Additionally, these brake parts are heat-treated for added strength and durability, ensuring that they can withstand the high temperatures and pressures of frequent use. Another key attribute of these brake parts is their corrosion-resistant properties. This makes them ideal for use in a wide range of environments and climates, as they are able to withstand exposure to moisture and other corrosive substances that can cause damage to other brake system parts. This makes these brake parts a great choice for electric motorcycle parts, as they are less susceptible to damage from exposure to moisture and other corrosive substances.

These Harley-Davidson motorcycle brake parts come with a limited lifetime warranty, ensuring that they are protected against defects in materials and workmanship. This gives customers peace of mind knowing that they are investing in a high-quality product that is backed by a strong warranty.

These brake parts are suitable for use in both the front and rear of the motorcycle, making them a versatile solution for a wide range of applications. They come packaged with 2 brake rotors and 2 sets of brake pads, making it easy to replace both the front and rear brakes at the same time.

In conclusion, Harley-Davidson motorcycle brake parts are a must-have for any Harley-Davidson motorcycle owner. These brake parts provide superior stopping power, durability, and performance, and are designed to withstand the high temperatures and pressures of frequent use. With a limited lifetime warranty and corrosion-resistant properties, these brake parts are a great investment for anyone looking to upgrade their brake system parts.

## Customization:

## Support and Services:

Our Harley-Davidson motorcycle brake parts are designed and manufactured to meet the highest standards of quality and performance. We offer a wide range of brake parts, including brake pads, brake rotors, and brake calipers, to ensure that your motorcycle has reliable and effective braking power.

Our technical support team is always available to answer any questions you may have about our products or provide assistance with installation or maintenance. Additionally, we offer a variety of services to help keep your Harley-Davidson motorcycle running smoothly, such as brake system inspections, fluid changes, and brake system upgrades.

When you choose our Harley-Davidson motorcycle brake parts, you can trust that you're getting the best possible products and support to keep you safe on the road.

## Packing and Shipping:

### Product Packaging:

The Harley-Davidson motorcycle brake parts product will be packaged in a sturdy cardboard box with the Harley-Davidson logo prominently displayed on the front. The parts will be securely wrapped in bubble wrap to prevent any damage during shipping. A packing slip will be included inside the box with a detailed list of the contents.

### Shipping:

The Harley-Davidson motorcycle brake parts product will be shipped via a reputable courier service to ensure timely and safe delivery. Customers will be provided with a tracking number so they can monitor the progress of their shipment. Shipping rates will vary depending on the destination and the weight of the product.

## FAQ:

A: Harley-Davidson offers two types of brake pads: Organic and Sintered.

Q: What is the difference between organic and sintered brake pads?

A: Organic brake pads are made of organic materials that provide a softer feel and less noise, while sintered brake pads are made of metallic particles that provide more stopping power and durability.

Q: Can I use sintered brake pads on my Harley-Davidson motorcycle?

A: Yes, sintered brake pads are compatible with Harley-Davidson motorcycles. However, they may produce more noise and wear on the rotor faster than organic brake pads.

Q: How often should I replace my Harley-Davidson motorcycle brake pads?

A: It is recommended to replace your brake pads every 10,000 to 20,000 miles or as soon as you notice a decrease in braking performance.

Q: Are Harley-Davidson motorcycle brake pads easy to install?

A: Yes, Harley-Davidson brake pads are designed to be easy to install and come with instructions. However, if you are not comfortable working on your motorcycle's braking system, it is recommended to have a professional mechanic install them for you.
