- Fitment: Direct Replacement
- Position: Front/Rear
- Size: Standard
- Highlight: **disc harley davidson brake parts, steel harley davidson brake pad, steel harley davidson brake parts**

Product Description

Product Description:

Our brake rotors feature a slotted design that improves heat dissipation and prevents brake fade, making them perfect for high-performance riding. They are also heat treated for improved durability and resistance to warping and cracking, ensuring that they will last for many miles to come. Additionally, the rotors are corrosion resistant, so they will maintain their sleek, black appearance even after years of use.

The included brake pads are designed to work seamlessly with the rotors, providing consistent and reliable braking power. They are made from high-quality materials that are resistant to wear and tear, ensuring that they will last for many miles before needing to be replaced.

Our Harley-Davidson Disc Brake Parts are a great choice for riders who demand the best in braking performance. These parts are specifically designed to fit Harley-Davidson motorcycles, so you can be sure that they will work perfectly with your bike. Additionally, they are compatible with a wide range of other motorcycle brands, including Kawasaki, making them a versatile choice for riders of all kinds. When you purchase our Harley-Davidson Disc Brake Parts, you can rest assured that you are getting a high-quality product that is built to last. We offer a limited lifetime warranty on all of our brake pad parts and casting motorcycle parts, so you can buy with confidence knowing that you are covered in the unlikely event of a defect or malfunction.

Features:

Product Name: Harley-Davidson motorcycle brake parts

Position: Front/Rear

Compatibility: Harley-Davidson Motorcycles

Applications:

Whether you are a professional motorcycle racer or simply someone who enjoys taking their bike out on the weekends, these brake parts are perfect for your needs. They are made from high-quality materials, including casting motorcycle parts and aluminum bike parts, ensuring that they can withstand even the toughest riding conditions.

These brake parts are also designed to be easy to install, making it simple for you to do it yourself. And with a quantity of 1 pair, you can rest assured that you will have everything you need to get the job done right.

One of the biggest benefits of these Harley-Davidson motorcycle brake parts is their compatibility with Kawasaki hydraulic motor parts. This means that if you own a Kawasaki motorcycle in addition to your Harley-Davidson, you can use these brake parts on both bikes. This makes them a great investment for anyone who owns multiple motorcycles.

Finally, these Harley-Davidson motorcycle brake parts come in a sleek black color that will look great on any bike. Whether you are looking to upgrade your bike's performance or simply replace worn-out brake parts, these disc brake parts are the perfect choice. So why wait? Order your pair today and enjoy a safer, more reliable ride on your Harley-Davidson motorcycle.

Product Packaging:

High-quality cardboard box

Customized foam inserts to securely hold brake parts

Product label with Harley-Davidson logo and product information

Shipping:

Shipped via UPS or FedEx

Shipping label with customer's address and tracking number

Product packaged securely to prevent any damage during transport

FAQ:

A: Harley-Davidson brake pads are designed to clamp the rotor directly, while brake shoes work by expanding and pressing against the inside of the drum. Pads provide better stopping power but require a rotor, while shoes are used on drum brake systems that don't have rotors.

Q: How do I know when I need to replace my brake pads?

A: Harley-Davidson brake pads have wear indicators that make a high-pitched noise when they need to be replaced. You may also notice your brakes feel spongy or take longer to stop than usual.

Q: Can I install Harley-Davidson brake parts myself?

A: While it is possible to install Harley-Davidson brake parts yourself, it is recommended to have a qualified mechanic perform the installation to ensure proper fit and function.

Q: How often should I change my brake fluid?

A: Harley-Davidson recommends changing brake fluid every two years to maintain proper brake performance.

Q: What is the warranty on Harley-Davidson brake parts?

A: Please refer to the Harley-Davidson warranty policy for specific details on the warranty coverage for brake parts.
