Product Description

Product Description:

Our Motorcycle Clutch Installation Kits are made with durable and top-quality materials, ensuring that they are long-lasting and reliable. The clutch kits are 8mm thick, with an inner diameter of 110mm, making them perfect for a wide range of motorbikes.

The Motorcycle Clutch Replacement Kits are available in black, which is a classic and timeless color. The black color also ensures that the kits are versatile and can match any motorbike color or design.

Our Motorcycle Clutch Installation Kits are also lightweight, weighing only 1.5kg. This makes them easy to handle and install, ensuring that you can replace your motorbike clutch without any hassle.

We stand behind our products and offer a 1-year warranty on all our Motorcycle Clutch Replacement Kits. This gives you peace of mind knowing that you are investing in a high-quality and reliable product that will last for years.

Whether you are a professional mechanic or a DIY enthusiast, our Motorcycle Clutch Kits are perfect for all your clutch replacement needs. With easy installation, durable materials, and a 1-year warranty, our kits are a must-have for anyone who owns a motorbike.

Applications:

This Motorcycle clutch kit is suitable for a wide range of bikes and is designed to be a direct bolt-on replacement for the original parts. It is a high-quality clutch kit that includes everything you need to replace your worn-out clutch. The kit includes a new clutch plate, friction plates, and springs, all designed to work together to provide a smooth and reliable clutch operation.

The black color of this clutch kit is not just for aesthetics, it also adds an extra layer of protection against rust and corrosion, ensuring that the kit lasts as long as possible. The 8mm thickness of the kit provides added durability, making it ideal for heavy use and high-performance applications.

The inner diameter of this kit is 110mm, which makes it suitable for a wide range of motorbikes. It is easy to install using the bolt-on method, and the kit comes with full instructions, making the installation process straightforward and hassle-free.

This Motorcycle clutch upgrade kit comes with a 1-year warranty, giving you peace of mind and ensuring that you can ride with confidence knowing that your clutch is working correctly. Whether you're a professional racer, a casual rider, or a mechanic, this clutch kit is an essential part of your motorbike maintenance toolkit.

Overall, this Motorcycle clutch kit is an excellent investment for anyone who wants to keep their bike running smoothly and reliably. It is a high-quality kit that is easy to install and comes with a 1-year warranty. Whether you're replacing a worn-out clutch or upgrading your bike for better performance, this kit is sure to meet your needs.

FAQ:

A: A Motorcycle clutch kit is a set of components that replace the worn-out or damaged clutch components of a Motorcycle.

Q: What is included in a Motorcycle clutch kit?

A: A typical Motorcycle clutch kit includes a clutch disc, pressure plate, release bearing, and pilot bearing.

Q: How do I know which Motorcycle clutch kit to choose?

A: You should choose a clutch kit that matches the make and model of your Motorcycle. You can also consult your owner's manual or a mechanic for guidance.

Q: How often should I replace my Motorcycle clutch kit?

A: The lifespan of a clutch kit varies depending on driving habits and conditions. However, it is recommended to replace the clutch kit every 50,000 to 100,000 miles.

Q: Is installation of a Motorcycle clutch kit difficult?

A: Installation of a Motorcycle clutch kit can be challenging and requires mechanical knowledge and expertise. It is recommended to have a professional mechanic install the kit.
