replacement

Product Description

Product Description:

Our Harley-Davidson motorcycle brake parts are made from high-quality steel, ensuring that they are durable and long-lasting. They are also heat-treated to provide maximum strength and durability, making them ideal for use in even the most demanding environments. In addition, our brake parts are corrosion-resistant, ensuring that they will continue to perform at their best no matter what conditions they are exposed to.

These brake parts are designed with a slotted design to provide superior stopping power. The slotted design allows for better heat dissipation, reducing the risk of brake fade and ensuring that your motorcycle can stop quickly and safely in any conditions. Whether you're riding on the highway or exploring off-road trails, our Harley-Davidson motorcycle brake parts will provide the ultimate in stopping power.

Our Harley-Davidson motorcycle brake parts are available in black, ensuring that they will look great on any motorcycle. They are also available in standard sizes, making them easy to install and compatible with a wide range of motorcycles. Whether you're looking for electric bike parts, Kawasaki hydraulic parts, or Kawasaki spare parts, our brake parts are an ideal choice.

Finally, our Harley-Davidson motorcycle brake parts come with a limited lifetime warranty, ensuring that you can ride with confidence knowing that your brake parts are covered in the event of any defects or issues. With our brake parts, you can enjoy peace of mind and the ultimate riding experience.

Features:

Product Name: Harley-Davidson motorcycle brake parts

Compatibility: Harley-Davidson Motorcycles

Type: Disc Brake

Size: Standard

Quantity: 1 Pair

Package Contents:

2 Brake Rotors

2 Sets Of Brake Pads

Keywords: Kawasaki Motor Parts, Brake Cylinder Parts, Electric Bike Parts

Technical Parameters:

Attribute	Value
Position	Front/Rear
Type	Disc Brake
Package Contents	2 Brake Rotors, 2 Sets Of Brake Pads
Material	Steel
Compatibility	Harley-Davidson Motorcycles
Features	Slotted Design, Heat Treated, Corrosion Resistant
Warranty	Limited Lifetime
Installation	Bolt-On
Color	Black
Fitment	Direct Replacement

Applications:

The Harley-Davidson brake parts are made from durable steel material that can withstand the wear and tear of daily use. The steel construction ensures that the parts are strong and long-lasting, making them the ideal choice for riders who want to save money on repairs and maintenance. The disc brake type provides superior stopping power, ensuring that riders can stop quickly and safely in any situation.

These brake parts are suitable for a variety of occasions and scenarios. Whether you are riding on the open road, cruising through the city, or taking your bike off-road, the Harley-Davidson brake parts will provide you with the performance and reliability you need. The parts are also suitable for a range of motorcycle makes and models, including casting motorcycle parts and Kawasaki spare parts.

The limited lifetime warranty provides peace of mind for riders, knowing that their investment is protected. You can be confident that you are getting a quality product that will last for years to come. Additionally, the brake pad parts are designed to provide consistent performance, ensuring that riders can enjoy a smooth and comfortable ride every time they take their bike out on the road.

In summary, the Harley-Davidson motorcycle brake parts are an excellent choice for riders who want to upgrade their bike's performance and safety. The direct replacement fitment, bolt-on installation, durable steel material, disc brake type, and limited lifetime warranty make these parts the ideal choice for any rider. Whether you are riding for pleasure or commuting to work, these brake parts will provide you with the confidence and peace of mind you need to enjoy your ride to the fullest.

Customization:

Support and Services:

Our Harley-Davidson motorcycle brake parts are designed to provide reliable and consistent performance. We offer a range of technical support and services to ensure that our customers receive the best possible experience with our products.

Our technical support team is available to answer any questions you may have about installation, maintenance, or troubleshooting. We also provide comprehensive product documentation, including user manuals and technical specifications, to help you get the most out of your Harley-Davidson motorcycle brake parts.

In addition, we offer a range of professional services to help you maintain and repair your motorcycle brake system. Our authorized service centers are staffed by experienced technicians who are trained to diagnose and repair any issues you may encounter with your brake system. We also offer parts replacement and upgrade services to help you customize your motorcycle to your exact specifications.

Packing and Shipping:

Product Packaging:

The Harley-Davidson motorcycle brake parts product will be packaged in a sturdy cardboard box with the company logo and product information printed on the outside. Inside the box, the brake parts will be securely wrapped in bubble wrap and/or foam to prevent any damage during shipping. A user manual and installation instructions will be included in the package.

Shipping:

The Harley-Davidson motorcycle brake parts product will be shipped via standard ground shipping through a reputable carrier such as FedEx or UPS. Customers will receive a tracking number so they can track their package. Shipping times and costs will vary depending on the destination and shipping method selected by the customer.

FAQ:

A1: Harley-Davidson recommends using Genuine Motor Parts brake pads for optimal performance and safety.

Q2: How often should I replace my brake pads?

A2: The recommended interval for brake pad replacement varies depending on riding conditions and usage. It is recommended to inspect your brake pads every 5,000 miles and replace them when the pads are worn down to 1/32 of an inch.

Q3: Can I install the brake pads myself, or do I need to take my motorcycle to a mechanic?

A3: It is recommended to have a certified Harley-Davidson technician install your brake pads to ensure proper installation and safety.

Q4: What is the difference between organic and sintered brake pads?

A4: Organic brake pads are made from materials such as rubber, Kevlar, and resin. They provide a softer feel and quieter operation, but may wear faster than sintered pads. Sintered brake pads are made from metallic particles fused together under high pressure and heat. They provide longer wear and better heat dissipation, but may be noisier and have a harder feel.

Q5: Can I use aftermarket brake pads on my Harley-Davidson motorcycle?

A5: While aftermarket brake pads may be cheaper, they may not provide the same level of performance and safety as Genuine Motor Parts brake pads. It is recommended to use only Genuine Motor Parts brake pads on your Harley-Davidson motorcycle.
