## Product Description

### Product Description:

Our Motorcycle Clutch Kits are made from high-quality steel, ensuring durability and longevity. The clutch plate is designed with an outer diameter of 130mm, providing the perfect fit for a wide range of motorcycles. The steel construction of the clutch kit ensures that it is resistant to wear and tear, ensuring a long-lasting performance. As a result, you don't have to worry about frequent replacements, saving you time and money.

Our Motorcycle Clutch Kits come with a bolt-on installation method, making it easy to install in your motorcycle. The bolt-on installation method ensures that the clutch kit is securely attached to the motorcycle, providing a smooth and efficient clutch operation. The installation process is straightforward and can be done quickly, ensuring that you can get back on the road as soon as possible.

Our Motorcycle Clutch Kits are made in China, ensuring that you get a high-quality product at an affordable price. China is known for producing high-quality motorcycle parts, and our clutch kits are no exception. We take pride in providing our customers with clutch kits that are reliable, durable, and affordable.

Our Motorcycle Clutch Kits are compatible with a wide range of motorcycles, making them a universal solution for your clutch needs. Whether you have a sports bike, cruiser, or touring bike, our clutch kits are designed to fit your motorcycle perfectly. You don't have to worry about compatibility issues, ensuring that you get a smooth and efficient clutch operation.

In conclusion, our Motorcycle Clutch Kits are the perfect solution for your clutch needs. With our clutch kits, you get a reliable, durable, and affordable product that is easy to install and compatible with a wide range of motorcycles. Whether you need a clutch service, maintenance, or installation, our clutch kits have got you covered. So, why wait? Order your Motorcycle Clutch Kit today and experience a smooth and efficient clutch operation.

Warranty	1 Year

### Applications:

The Motorcycle Clutch Kits product is a versatile tool that can be used in various application occasions and scenarios. Below are some of the most common ones:

**Motorcycle Clutch Repair Kits:** The clutch kits are ideal for repairing a damaged or worn-out clutch system. With the kit, you can easily replace the clutch plates, springs, and other parts that are essential for the proper functioning of the clutch system. This is a cost-effective solution that saves you money compared to buying a new clutch system.

**Motorcycle Clutch Service Kits:** The clutch kits are also ideal for routine maintenance and servicing of the clutch system. With the kit, you can replace the clutch plates and springs that have worn out due to regular use. This helps to ensure smooth operation of the clutch system and prevent any potential breakdowns.

**Motorcycle Clutch Upgrade Kits:** The clutch kits can also be used to upgrade the clutch system of your motorcycle. This is especially useful for riders who use their motorcycles for racing or other high-performance activities. With the kit, you can replace the stock clutch plates and springs with high-performance ones that can handle more torque and power.

**Motorcycle Clutch Replacement Kits:** The clutch kits are also ideal for replacing a damaged or faulty clutch system. With the kit, you can easily replace the entire clutch system, including the clutch plates, springs, and other parts that are essential for the proper

functioning of the clutch system. This is a cost-effective solution that saves you money compared to buying a new clutch system. The Motorcycle Clutch Kits product comes with a 1-year warranty, giving you peace of mind knowing that you are protected against any manufacturing defects or faults. The product is made in China, ensuring high quality and durability.

### Customization:

Model Number: We can customize the clutch kit to fit your specific motorcycle model.

Weight: Our standard kit weighs 1.5kg, but we can adjust the weight to meet your preferences.

Thickness: The standard thickness of our clutch kit is 8mm, but we can customize this measurement to your liking.

Product Type: Our customization services offer Motorcycle Clutch Maintenance Kits, Motorcycle Clutch Assembly Kits, and Motorcycle Clutch Upgrade Kits.

Material: Our clutch kits are made of high-quality steel.

Inner Diameter: Our standard inner diameter is 110mm, but we can adjust this measurement to fit your motorcycle's specifications.

### Support and Services:

Our Motorcycle clutch kits are designed to provide high performance and durability for all types of motorcycles. We offer technical support and services to ensure that our customers have a seamless experience with our products. Our team of experts is available to assist with any installation or maintenance questions to ensure that your clutch kit is working at its best. We also offer repair and replacement services for any damaged or worn out components. Our goal is to provide the highest level of customer service and support to our valued customers.

### FAQ:

A: A motorcycle clutch kit is a set of components that includes a clutch plate, pressure plate, and springs that work together to control the transmission of power from the engine to the transmission.

Q: What is the model number of this clutch kit?

A: The model number for this clutch kit is [insert model number here].

Q: What types of motorcycles is this clutch kit compatible with?

A: This clutch kit is compatible with [insert compatible motorcycle types here]. Please refer to the product description or consult with a professional mechanic to ensure compatibility with your specific motorcycle.

Q: How do I know if my motorcycle needs a new clutch kit?

A: Some signs that your motorcycle may need a new clutch kit include slipping or difficulty in shifting gears, a burning smell, or a change in the resistance of the clutch lever. Consult with a professional mechanic for a proper diagnosis.

Q: Can I install this motorcycle clutch kit myself?

A: It is recommended that a professional mechanic installs this clutch kit to ensure proper installation and functionality. However, if you have experience with motorcycle maintenance and feel confident in your abilities, you can attempt to install it yourself following the manufacturer's instructions.
