Product Description

Product Description:

The BMW motorcycle brake parts are compatible with all BMW motorcycles, and they are designed to provide superior stopping power and long-lasting reliability. These brake parts are available for both front and rear positions, allowing you to choose the one that suits your needs best.

The package contents of the BMW motorcycle brake parts include one brake rotor and one set of brake pads. The brake rotor is made of high-quality materials that ensure its durability and longevity, while the brake pads are designed to provide optimal friction and performance for your BMW motorcycle.

These brake parts are easy to install, and they come with all the necessary tools and instructions to help you get the job done quickly and efficiently. Whether you are a seasoned mechanic or a DIY enthusiast, you can install these brake parts with ease and confidence.

Our BMW motorcycle brake parts are not only compatible with BMW motorcycles, but they are also suitable for Kawasaki motor parts. So, if you own a Kawasaki motorcycle, you can rest assured that these brake parts will work just as well for you.

Overall, if you are looking for high-quality brake plate and brake pad parts for your BMW motorcycle or Kawasaki motor parts, then our BMW motorcycle brake parts are the perfect solution for you. With their superior stopping power, long-lasting reliability, and ease of installation, you can enjoy a safe and smooth ride on your motorcycle for years to come.

Features:

Product Name: BMW motorcycle brake parts

Fitment: Direct Replacement

Part Number: 34212312345

Material: Steel

Compatibility: BMW Motorcycles

Weight: 1.5 Lbs

Features:

Includes brake plate and brake pad parts

High-quality steel for durability and longevity

Direct replacement for easy installation

Technical Parameters:

Material:	Steel
Country Of Origin:	Germany
Weight:	1.5 Lbs
Position:	Front/Rear
Warranty:	1 Year
Compatibility:	BMW Motorcycles
Fitment:	Direct Replacement
Type:	Disc Brake
Installation:	Bolt-On
Size:	Standard

Applications:

The brake parts are suitable for a variety of different applications and occasions. They are ideal for use in racing scenarios where high-performance braking is essential. The brake parts can also be used in everyday situations, such as commuting or leisure riding.

The BMW motorcycle brake parts are designed to be bolt-on, which means that they can be easily installed on the motorcycle without the need for any additional modifications or special tools. This makes the installation process quick, simple, and hassle-free.

The brake parts are manufactured in Germany, which is known for its high-quality engineering and precision manufacturing. This ensures that the brake parts are of the highest quality and are built to last.

The BMW motorcycle brake parts consist of a brake plate and brake pad parts. The brake plate is the main component of the braking system and is responsible for stopping the wheel when the brake is applied. The brake pad parts are the friction material that is applied to the brake plate, creating the necessary friction to slow down or stop the motorcycle.

The minimum order quantity for the BMW motorcycle brake parts is 100, which makes them ideal for wholesalers, retailers, or motorcycle dealerships. The brake parts come with a 1-year warranty, which provides customers with peace of mind and ensures that they are getting a high-quality product that is built to last.

Customization:

Customize your BMW motorcycle brake parts with our product customization services. Our brake plate is CE certified and has a weight of

1.5 Lbs and a standard size. The minimum order quantity is 100 units.
