## Product Description

### Product Description:

Our brake pad parts are designed and manufactured with the highest standards, ensuring that you get the best possible performance and durability out of your braking system. With a high friction coefficient, these pads will deliver consistent and reliable stopping power every time you hit the brakes, even in the toughest off-road environments.

Each package contains one pair of brake pads, designed to fit perfectly onto your MX bike. Whether you're a professional racer or a weekend warrior, these pads are the ideal choice for anyone looking for superior stopping power and long-lasting durability.

Our ceramic brake pads are built to last, with a design that minimizes wear and tear on your braking system. This means you'll get more mileage out of your pads, and you won't have to worry about replacing them as frequently as with other, lower-quality options.

So if you're looking for the best front brake pads for your MX bike, choose our top-quality ceramic brake pads. With strong stopping power, a high friction coefficient, and long-lasting durability, these pads are the perfect choice for any serious rider.

### Features:

Product Name: Motorcycle brake pad

Product Type: Motorcycle Parts & Accessories

Suit For: Honda CRF R X 450 250

Durability: Long Lasting

Stopping Power: Strong

Friction Coefficient: High Friction Coefficient

### Applications:

The back plate of these brake pads is copper-based, meaning they have excellent heat dissipation properties. This feature not only helps to prevent overheating but also contributes to the brake pad's long-lasting durability. The high friction coefficient of the brake pad ensures that the motorcycle stops quickly and smoothly, enhancing the rider's safety and confidence while on the road.

The low noise level of the brake pad is also a significant advantage. The noise level is often an issue for riders, especially for those who ride long distances or in urban areas. With these brake pads, riders can enjoy a quieter ride without sacrificing performance.

The motorcycle brake pad is suitable for a wide range of application occasions and scenarios. It is ideal for riders who enjoy leisurely rides, as well as those who use their motorcycles for daily commuting. The brake pad is perfect for use in both urban and rural areas, making it a versatile and reliable choice for any rider.

The minimum order quantity for this product is ten, making it easy for riders to purchase the brake pads they need without having to worry about ordering large quantities. Whether you are a professional motorcycle mechanic or a rider who wants to ensure their safety on the road, these brake pads are an excellent choice.

Overall, the motorcycle brake pad is a highly reliable and durable product that provides exceptional stopping power and performance.

With its high friction coefficient, low noise level, and long-lasting durability, it is an excellent choice for anyone who wants to enhance their motorcycle's safety and performance.

### Customization:

Looking for customized Ceramic Brake Pads for your motorcycle? Look no further than our product, originating from China and certified with CE. Our minimum order quantity is only 10, and we offer custom services and OEM replacements. Our brake pads offer strong stopping power and are specifically designed for the Pulsar 180/135 model and suit for Honda CRF R X 450 250. Trust us to provide you with the best quality Brake Plate and Brake Pad for your motorcycle.
