Product Description

Product Description:

Our motorcycle brake pads have a high friction coefficient, which means they can provide excellent stopping power even in wet conditions. This is due to the ceramic brake pads, which can provide consistent and reliable stopping power. These friction brake pads are designed to be long-lasting and durable, ensuring that you don't have to replace them frequently. They are also easy to install, making them a great option for those who want to upgrade their motorcycle's braking system without spending a lot of time or money.

With our motorcycle brake pads, you can enjoy a smooth and safe ride, knowing that your brakes are working as they should. They are perfect for those who enjoy riding their Pulsar 180/135 motorcycles on challenging terrain or in high-traffic areas, where strong stopping power is essential to avoid accidents.

So, if you are looking for high-quality friction brake pads for your Pulsar 180/135, look no further than our copper-based brake pads. With a strong stopping power, high friction coefficient, and long-lasting durability, our brake pads are a great investment for any motorcycle enthusiast.

Features:

Product Name: Motorcycle brake pad

Custom Service: OK

Model: Pulsar 180/135

Noise Level: Low Noise

OEM Replacement: OK

Performance: High Performance

Type: Friction Brake Pads

Material: Ceramic Brake Pads

Position: Front Brake Pads

Applications:

Our brake pads are made with high-quality materials and are designed to meet OEM standards. They are a perfect replacement for OEM brake pads and are guaranteed to perform just as well, if not better. The ceramic brake pads are designed to provide superior stopping power and are perfect for riders who demand the best.

Our Motorcycle brake pads can be used in a variety of occasions and scenarios. They are perfect for riders who love to take their bikes out on the open road and enjoy the thrill of speed. They are also perfect for riders who like to take their bikes off-road and push them to their limits.

The brake pads are specifically designed for the front brakes of Honda CRF R X 450 250 bikes. They are perfect for riders who want to upgrade their front brake pads and experience better performance and stopping power. These brake pads are a must-have for anyone who wants to improve their bike's braking performance.

Our Motorcycle brake pads are also very versatile and can be used in a variety of different scenarios. They are perfect for riders who need to stop quickly in emergency situations. They are also great for riders who want to make quick stops while riding in traffic. These brake pads are a great addition to any rider's kit.

Our Motorcycle brake pads also come with custom service options. This means that riders can get their brake pads customized to their specific needs. This is perfect for riders who have unique requirements and want a product that is designed specifically for them.

In conclusion, Our Motorcycle brake pads are a high-performance product that is perfect for riders who demand the best. They are designed to meet OEM standards and are a perfect replacement for OEM brake pads. They are perfect for a variety of occasions and scenarios and are a must-have for anyone who wants to improve their bike's braking performance.

Customization:

Support and Services:

Our Motorcycle brake pad product is backed by our comprehensive technical support and services to ensure that our customers get the most out of their purchase. Our team of experienced technicians are available to answer any technical questions and concerns that our customers may have. We also offer installation services and maintenance advice to ensure that the brake pads are installed and maintained correctly, maximizing their lifespan and performance. In the event of any issues or defects, our warranty program provides quick and easy replacements to minimize any downtime for our customers.

Packing and Shipping:

Product Packaging:

The motorcycle brake pads will be packaged in a sturdy cardboard box with foam padding to ensure that they arrive safely and undamaged. The box will be labeled with the product name, brand, and any necessary warnings or instructions.

Shipping:

We offer both domestic and international shipping for our motorcycle brake pads. Domestic orders will be shipped via standard ground shipping and should arrive within 3-5 business days. International orders may take longer to arrive depending on the destination country and shipping method chosen. Customers will receive a tracking number once their order has been shipped so they can monitor its progress.
