Product Description:

Our brake pads are perfect for those looking for a high-performance upgrade to their motorcycle's braking system. Whether you're a professional rider or just looking to improve your bike's performance, our ceramic brake pads deliver exceptional stopping power and improved braking response.

Our copper-based friction brake pads are designed to provide maximum stopping power, even under the most extreme riding conditions. These brake pads are custom-made to fit your motorcycle's make and model, ensuring a perfect fit and easy installation.

Our brake pads are an excellent choice for riders looking for an OEM replacement. These brake pads are designed to meet or exceed OEM specifications, providing a reliable and cost-effective alternative to expensive dealership parts.

Our brake pads come in various types, including front brake pads, rear brake pads, and ceramic brake pads. Front brake pads are essential for ensuring optimal stopping power, as the majority of your bike's stopping power comes from the front brakes. Rear brake pads are equally important, as they help balance your motorcycle and provide additional stopping power when needed.

Our ceramic brake pads are an excellent choice for those looking for the ultimate in performance and durability. These brake pads are designed to deliver exceptional stopping power, even under the most extreme riding conditions. Ceramic brake pads also produce less dust and noise than traditional brake pads, making them an excellent choice for riders looking for a cleaner and quieter braking system.

At our company, we're committed to providing our customers with the highest-quality motorcycle brake pads on the market. Our brake pads are custom-made to fit your motorcycle's make and model, ensuring a perfect fit and easy installation. With our high-performance ceramic brake pads, front brake pads, and friction brake pads, you can count on us for the ultimate in stopping power and performance.

Features:

Product Name: Motorcycle brake pad
Model: Pulsar 180/135
Suit For: Honda CRF R X 450 250
Application For: MX Bike
Product Type: Motorcycle Parts & Accessories
Stopping Power: Strong
Keywords: Friction Brake Pads, Brake Pad Parts, Brake Pad

Technical Parameters:

Product Type	Motorcycle Parts & Accessories
Application For	MX Bike
Model	Pulsar 180/135
Oem Replacement	OK
Friction Coefficient	High Friction Coefficient
Noise Level	Low Noise
Quality	OEM Standard
Surface	Copper Based
Durability	Long Lasting
Suit For	Honda CRF R X 450 250

Applications:

The Motorcycle brake pad is a highly efficient and reliable brake pad product. Made in China, it is certified with CE, ensuring its quality and safety. The minimum order quantity for this product is 10, making it an excellent choice for both personal and commercial use.

The Motorcycle brake pad is specifically designed for MX bikes. It is suitable for Honda CRF R X 450 250, making it a perfect fit for those bike models. The product is also an OEM replacement, which means it can be used to replace the original brake pad parts without any issues.

The Motorcycle brake pad is modelled after Pulsar 180/135, making it a great choice for those bike models. The surface is copper-based, ensuring that it is durable and can withstand the rigours of frequent use. The product is also highly efficient and has a long lifespan, ensuring that the user can enjoy its benefits for an extended period of time.

The Motorcycle brake pad is perfect for a variety of occasions and scenarios. It is ideal for personal use, whether it be for daily commutes or weekend rides. It is also perfect for commercial use, such as rental services or delivery services. The product's reliability and efficiency make it an excellent choice for a variety of applications.

The Motorcycle brake pad is perfect for those looking for a ceramic brake pad that is built to last. It is highly efficient and provides excellent stopping power, making it a safe and reliable choice for anyone who needs it. The product is also easy to install, making it an excellent choice for those who need a quick replacement for their brake plate.

Customization:

Looking for customized Friction Brake Pads for your motorcycle's front brake? Look no further than our OEM standard Brake Pads, designed specifically for the Pulsar 180/135 models. Made in China with CE certification, our Brake Pads are guaranteed to last a long time with their copper-based Back Plate. With a minimum order quantity of only 10, you can trust that our Brake Pads are an affordable and reliable choice for your motorcycle. Plus, with our OEM Replacement option, you can be sure that our Brake Pads will fit perfectly with your motorcycle's existing parts.

Support and Services:

Our motorcycle brake pads are designed to provide superior stopping power and long-lasting performance. We use high-quality materials and advanced manufacturing processes to ensure that our brake pads meet or exceed industry standards for safety and reliability. Our technical support team is available to assist you with any questions or issues you may have regarding your motorcycle brake pads. We can provide guidance on installation, maintenance, and troubleshooting to help you get the most out of your brake pads. In addition to our technical support, we offer a range of services to help you keep your motorcycle brake pads in top condition. We offer brake pad replacement and installation services, as well as brake system inspections and maintenance. Our goal is to help you maintain safe and reliable braking performance on your motorcycle.
